Weather Key Points

Regional Operations Center

Western Region

Sunday, November 13

- Locally breezy winds gusting up to 45 mph are expected over much of southern California on Sunday
- A Santa Ana wind event with wind gusts of 45-60 mph is expected Tuesday through Thursday (strongest Wednesday) in southern California, with locally elevated fire weather conditions
 - Locally gusty winds are expected north into portions of the Central Valley and the southern Sierras.
- Below normal temperatures will persist over much of the state through the week, with overnight low temperatures dipping into the 30s across the Central Valley and even for areas closer to the coast at times. Readings over the higher elevations will reach the single digits. Areas of frost are possible overnight into early morning hours through the week for most locations.

Daily Precipitation Forecast

Regional Operations Center
Western Region
Sunday, November 13

Precipitation is not expected through Tuesday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Sunday, November 13
